

VON DUPRIN®

94/95 Series INPACT™

Exit device – recessed

Overview

The 94/95 Series INPACT recessed push pads are for high-traffic applications and reduce impact. They are fully integrated within a door to protect it from abuse.

Both the 94 and 95 Series are low-profile devices and are compatible with hollow metal doors and are commonly used in hospitals and other facilities where building openings must accommodate high volumes of people and equipment.

Features and benefits

- Reduced projection of push pad reduces potential obstruction
- Quiet electronic latch retraction option for access control applications
- Available as part of Allegion INPACT door system
- Antimicrobial coating available
- Sloped die-cast metal endcaps deflect impact
- Extruded aluminum construction
- Available with less bottom rod to reduce floor obstruction
- Non-handed design
