

VON DUPRIN®

## Security indicators

### Overview

Designed for high use and abuse institution environments, such as schools and hospitals, these Von Duprin® products are recommended for the following applications:

- Visual verification - Reduce the time it takes to tour your facility and ensure each door is secure by installing the Von Duprin security indicator to provide at-a-glance visual verification.
- Lockdown - Lock down high occupancy areas such as auditoriums, cafeterias and gymnasiums, from inside the room with the Von Duprin security indicator that provides positive visual confirmation.

The CDSI/HDSI dogging indicator provides an at-a-glance verification of the status of the door from inside of the room. Visible "LOCKED" and "UNLOCKED" indicators show whether the device is undogged or dogged. This feature can be used with hex key (HDSI) or cylinder dogging (CDSI) options on various device types—rim, mortise and vertical systems.

The -2SI Security Indicator provides an at-a-glance verification of the LOCKED/UNLOCKED status of the door from inside of the room. This option can be ordered as a new product or as a retrofit conversion kit to an existing 98/99 device.

### Features and benefits

- Lockdown solution that meets fire and life safety codes for free egress
- Modular conversion kits allow you to quickly and easily upgrade your existing devices
- Visual indication of whether the exit device is locked or unlocked from inside a room

#### **2SI security indicator with double cylinder**

- Pad-printed directional indicator provides a clear direction of rotation to secure opening
- Available for 98/99 Series devices

#### **CDSI/HDSI dogging indicator**

- Hex or cylinder dogging options
- Visual indication of whether the exit device is dogged or undogged
- Available for 98/99 and 33A/35A Series panic devices
