

WHY INDICATORS ARE IMPORTANT

Schools, universities, hospitals and other facilities face unprecedented challenges and must maintain code compliance while hardening security. Von Duprin® has developed indication solutions that support this by allowing the user to:

REMAIN ON THE SECURE SIDE OF THE DOOR

Quickly determine the status of the device from a distance

Intuitively change the status of the device

MAINTAIN FREE EGRESS

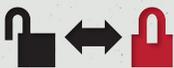

Comply with fire and life safety code requirements

TYPES OF INDICATORS

STATUS

Von Duprin **status indicators** aid lockdown procedures by providing visual verification of the status of the door from the interior.

DIRECTIONAL

Von Duprin **directional indicators** aid the user in determining which way the key or thumb turn must be rotated to secure the opening.

VON DUPRIN SOLUTIONS

EMERGENCY SECURE LOCKDOWN (ESL)

- ✓ Status indicator
- ✓ Directional indicator
- ✓ Change state of door from interior<sup>1</sup>

DOGGING SECURITY INDICATORS (CDSI/HDSI)

- ✓ Status indicator
- ✗ Directional indicator
- ✓ Change state of door from interior<sup>2</sup>

DOUBLE CYLINDER (-2)

- ✗ Status indicator
- ✓ Directional indicator
- ✓ Change state of door from interior<sup>3</sup>

SECURITY INDICATOR WITH DOUBLE CYLINDER (-2SI)

- ✓ Status indicator
- ✓ Directional indicator
- ✓ Change state of door from interior

<sup>1</sup> Interrupts power to CGL  
<sup>2</sup> Standard mechanical dogging and undogging operation  
<sup>3</sup> Interior cylinder controls external trim
